Subject: Microsoft settlement

Please settle the Microsoft case without any further litigation. I believe this lawsuit has been harmful to consumers and the American economy. The very day it was announced the stock market went down and every time there is a negative statement about Microsoft it goes down again.

It is obvious that those wealthy competitors of Microsoft who oppose the settlement don't care about the economy and welfare of our country as they oppose Microsoft giving the poor schools and children computers so they have the same opportunity as children in more well do do schools to learn and prepare themselves for their futures.

Please put a stop to all litigations of this case.

Thank you,

Evelyn Moser
